

CARBON KILLER

DISSOLVES CARBON ON CONTACT

DESCRIPTION

Slip 2000 Carbon Killer is an aggressive water based cleaner that was developed for removing nasty carbon, lead and plastic fouling from you metal gun parts. For best results Carbon Killer should be used with a Slip 2000 Lubricant. Using both products as a system will reduce you cleanup time by as much as 75%.

USER FRIENDLY - ENVIROMENTALLY SAFE (GREEN)

Slip 2000 Carbon Killer is a Non-Toxic, Non-Hazardous, Biodegradable, GREEN product. As a GREEN product there are no hazmat fees for shipping or storage. It has a mild citris sent that makes working in a confined cleaning area or around others safer and less offensive then some cleaners.

STORAGE

For long term storage Carbon Killer must be stored in an air tight container. Any glass, stainless steel or PET plastic contain will work just fine.

REUSABLE

Slip 2000 Carbon Killer does not stop working after one use and can be used again and again. If stored properly one container will provide multiple cleanings.

MIX IT UP

As you use Carbon Killer it will turn black and discolored as it emusifies the carbon, lead and plastic fouling. Just remember to mix it before use as the product will seperate over time.

WORKS GREAT ON

Slip 2000 Carbon Killer works great on any metal gun part that has carbon, lead and/or plastic fouling on it such as: revolver cylinder, forcing cones, compensators, gas pistons, bolts and carriers, firing pins, bores, cans, silencers, flash suppressores and more.

Built for use on: all revolvers, pistols, automatic and semi-automatic weapons including AK47, M16, AR15, 37mm-40mm, MP5 and all Machinguns like M60 and 240 / 249 SAW. The Navy has Speced this product in for use on the M 72 LAW.

**BIODEGRADABLE • USER FRIENDLY
NON-REGULATED
NON-TOXIC • NON-HAZARDOUS**

SIMPLE TO USE

Slip 2000 Carbon Killer is easy to use. Completely submerge your dirty, metal gun parts into the solution for 5 to 15 minutes. Remove parts and wipe carbon, lead and plastic fouling off. If you are not using a Slip 2000 Lubricant or you parts have been very neglected you might need to use a brush and an additional soaking may be required.

AS A BORE CLEANER

Slip 2000 Cabon Killer works great as a bore cleaner. Simply Push a wet patch or mop through barrel and allow to soak 2-5 minutes. Run a brush through your bore. Repeat if necessary. Follow with a wet patch of a Slip 2000 Lubricant to displace any moisture.

NOTE: Carbon Killer should not be allowed to dry out when using it.

**CLEAN YOUR:
AK47, M16, AR15, MP5,
and all machineguns like:
M60, 240/249 SAW**

We recommend applying a Slip 2000 Lubricant to all metal parts right after cleaning. Slip 2000 Lubricant will displace any residual moisture left behind from cleaning. Slip 2000 Lubricant will also prevent future carbon from sticking. When used together as a system your next cleaning will take half the time.

CARBON KILLER

BELIEVE IT OR NOT: CARBON REMOVAL IS THIS EASY

Tear down weapon to be cleaned and place all metal parts into a stainless steel parts tray filled with Carbon Killer.

Make sure all parts are completely submersed in solutin.

Remove parts after 5 - 15 minutes and wipe parts clean. If you are not using a Slip 2000 Lubricant an additional soaking may be required.

Notice how the carbon instantly comes off on your hand before you even begin to wipe it clean.

Extremely nasty and neglected parts may require a light brushing or a little rubbing with a Scotch Bright type pad.

After parts have been wiped or rinsed clean, make sure to relube with a Slip 2000 Lubricant. This will displace any moisture and prevent any corrosion.

It will also prevent carbon from building up and reduce your next cleanup time..

CARBON KILLER JUST WORKS

It does not matter what you are cleaning, you will be amazed at how easy and fast Carbon Killer removes burnt on carbon.
